**Guidelines of the Department of Disinvestment**  
(Refer Clause 1.2.3)

No. 6/4/2001-DD-II  
Government of India  
Department of Disinvestment

Block 14, CGO Complex  
New Delhi.

Dated 13<sup>th</sup> July, 2001.

OFFICE MEMORANDUM

Sub: Guidelines for qualification of Bidders seeking to acquire stakes in Public Sector Enterprises through the process of disinvestment

Government has examined the issue of framing comprehensive and transparent guidelines defining the criteria for bidders interested in PSE-disinvestment so that the parties selected through competitive bidding could inspire public confidence. Earlier, criteria like Net Worth, experience etc. used to be prescribed. Based on experience and in consultation with concerned departments, Government has decided to prescribe the following additional criteria for the qualification/disqualification of the parties seeking to acquire stakes in public sector enterprises through disinvestment:

- (a) In regard to matters other than the security and integrity of the country, any conviction by a Court of Law or indictment/ adverse order by a regulatory authority that casts a doubt on the ability of the bidder to manage the public sector unit when it is disinvested, or which relates to a grave offence would constitute disqualification. Grave offence is defined to be of such a nature that it outrages the moral sense of the community. The decision in regard to the nature of the offence would be taken on case to case basis after considering the facts of the case and relevant legal principles, by the Government of India.
- (b) In regard to matters relating to the security and integrity of the country, any charge-sheet by an agency of the Government/ conviction by a Court of Law for an offence committed by the bidding party or by any sister concern of the bidding party would result in disqualification. The decision in regard to the relationship between the sister concerns would be taken, based on the relevant facts and after examining whether the two concerns are substantially controlled by the same person/ persons.

- (c) In both (a) and (b), disqualification shall continue for a period that Government deems appropriate.
- (d) Any entity, which is disqualified from participating in the disinvestment process, would not be allowed to remain associated with it or get associated merely because it has preferred an appeal against the order based on which it has been disqualified. The mere pendency of appeal will have no effect on the disqualification.
- (e) The disqualification criteria would come into effect immediately and would apply to all bidders for various disinvestment transactions, which have not been completed as yet.
- (f) Before disqualifying a concern, a Show Cause Notice why it should not be disqualified would be issued to it and it would be given an opportunity to explain its position.
- (g) Henceforth, these criteria will be prescribed in the advertisements seeking Expression of Interest (EOI) from the interested parties. The interested parties would be required to provide the information on the above criteria, along with their Expressions of Interest (EOI). The bidders shall be required to provide with their EOI an undertaking to the effect that no investigation by a regulatory authority is pending against them. In case any investigation is pending against the concern or its sister concern or against its CEO or any of its Directors/ Managers/ employees, full details of such investigation including the name of the investigating agency, the charge/ offence for which the investigation has been launched, name and designation of persons against whom the investigation has been launched and other relevant information should be disclosed, to the satisfaction of the Government. For other criteria also, a similar undertaking shall be obtained along with EOI.

## APPENDIX- IV

### **Information Memorandum for 500 Model Schools through Public Private Partnership**

*The information contained herein is tentative and indicative. The precise terms of the scheme will be spelt out in the Concession Agreement which will form part of the bid documents at the RFP stage.*

#### **1. Preamble**

- 1.1 This scheme for setting up of model school through Public Private Partnership (PPP) has been formulated in pursuance of the Government decision to set up 2,500 model schools through PPP in blocks to be selected out of 3,203 blocks which have been identified as Non-Educationally Backward Blocks. The principal objective of this scheme is to set up senior secondary schools, for providing access to quality education to the rural children.
- 1.2 It is well recognized that education is a pre-requisite for the growth and development of a modern and equitable socio-economic order. It is essential for empowering and enabling the economically weaker sections of the society to participate more fully in a democratic polity that identifies equality of opportunity as one of its cherished goals. For these reasons, education, especially school education, is regarded as the responsibility of the Government and the recent enactment of the Right to Education Act is a step in that direction.
- 1.3 Over the last 60 years, successive Governments have been committed to achieving the national goal of universal education and have steadily increased the budgetary allocation for education. At present, the expenditure on education in India is about 3.7% of the GDP and this needs to be increased to at least 6% of the GDP, especially for addressing unequal access to education in rural areas and among the urban poor.
- 1.4 The provision of universal school education is a complex task of gigantic proportions in a country like India. It is, therefore, essential to explore diverse options for providing school education and financing the same in pursuance of the education goals set by the Government. The scheme for setting up 6,000 new schools as model pace-setting institutions to set benchmarks across the country is an important initiative of the present Government and the decision to provide 2,500 schools out of 6,000 through Public Private Partnership (PPP) constitutes recognition of the need for plurality in the system of providing education services. The objective of all model schools, including those in the PPP mode, would be to enhance access to quality education for all, especially those who live in rural areas or under-served urban areas and belong to low-income families.

- 1.5 The scheme for 2,500 model schools under PPP mode should be viewed as an opportunity to evolve innovative ways to empower and enable non-government players to engage in providing quality education to children especially from low-income rural families. The objective should be to combine the respective strengths of the public and private sectors to complement each other in pursuit of the shared goal of good education for all. In particular, adoption of the PPP mode would lead to rapid expansion of access to quality education by low-income families.

## **2 Objective of the Scheme**

### **2.1 *Creating access to quality education***

Children from low-income families in rural as well as urban areas are unable to access high quality school education as they cannot afford to pay the fees normally charged by good private schools while good schools that can provide such access in the public sector are limited. To ensure inclusive growth and an equitable socio-economic order, affirmative action is necessary to accelerate the provision of quality education to those who have hitherto lacked access. The objective of this scheme is to set up 2,500 schools through Public Private Partnership (PPP) for providing quality education to about 40 lakh children, of which 25 lakh would be from socially and economically disadvantaged categories (the “Select Students”). These schools will reach out to the underprivileged children and educate them with a view to enabling them to avail of the opportunities offered by growth and development.

### **2.2 *Centers of Excellence***

The objective of this scheme is to create centers of excellence in school education by combining the respective strengths of the public and private sectors in a manner that would create models in the respective Blocks and set benchmarks for others to emulate. By focusing on low income families, these schools will help build a cohesive, secular and merit-based environment that would promote inclusive growth and train future leaders.

## **3 PPP-the concept**

- 3.1 PPP in school education is essentially an arrangement where the private sector partner participates in the provision of services traditionally provided by the Government. It is usually characterized by an agreement between the government and the private sector, with the latter undertaking to deliver an agreed service on the payment of a unitary charge by the Government. The need for PPP in school education primarily arises out of the Government’s commitment to provide quality education to under-privileged children who cannot afford the tuition fee that a private school would normally charge. The justification for PPP schools arises primarily from the need to accelerate the

expansion of education, supplement investment and enable different models for improving the quality of education.

- 3.2 PPPs are sometimes mistaken for privatization which normally involves withdrawal of the Government in favour of market based operations. In fact, a sound PPP contract enables the Government to retain oversight and control over all critical elements of performance and outcomes while payments are typically made against services delivered. Through this mode of procurement, the government hopes to achieve a comparatively better outcome by combining the respective strengths of the public and the private sector in the form of a true partnership that would ensure a better outcome as compared to public or private schools.
- 3.3 PPP schools will not be private enterprises acting in pursuit of profits. Nor will their management have the freedom that a private school normally enjoys in matters such as admissions and fees. These schools will essentially be public schools run by non-profit private entities which are to be guided by the public objectives set by the Government and enshrined in an enforceable contract. The success of PPPs as an efficient mode of implementation of public projects has already been demonstrated in several sectors such as highways, airports, ports, power, railways, etc.

#### **4 Benefits of the PPP Approach**

Some good reasons for adopting the PPP approach for scaling up capacity in school education are as follows:

- (i) The investments required may be too large compared to available budgetary resources, and private capital could, therefore, enable an accelerated roll out of schools;
- (ii) functional efficiency of private entities would enable early delivery of quality education;
- (iii) risk of project completion and delivery of agreed outputs would be transferred to the private entity;
- (iv) public funds would be expended only upon delivery of agreed outcomes; and
- (v) private sector efficiency in the context of a long-term agreement is expected to optimise on life-cycle costs and improve on quality of education, including the school infrastructure.

#### **5 Proposed framework for PPP schools**

The proposed framework for setting up and managing 2,500 schools under this scheme would be as follows:

### **5.1 *Schools to adhere to CBSE guidelines***

All schools under this scheme would have to adhere to CBSE norms, standards and guidelines relating to affiliation, character of management, syllabus, teacher/student ratio, infrastructure, land, class rooms, labs, library, extracurricular activities, playgrounds, quality of education, teacher qualifications, service conditions, teachers' salary, examination, reserve fund, accounting and audit, pedagogy etc. Since these schools are expected to be Model Schools, the Concession Agreement would provide for additional norms which would be in accordance with Good Education Practice. In exceptional circumstances, affiliation with National Boards other than CBSE may also be considered.

### **5.2 *Location of PPP schools***

The location of the 2,500 model schools under PPP mode would be headquarters of the blocks which are not educationally backward. In Blocks where a model school has already been set up or is being planned under Corporate Social Responsibility (CSR), no model school shall be set up.

### **5.3 *Infrastructure, teaching and management by private entities***

Selected private entities, such as trusts, societies and not-for-profit companies, will be responsible for providing infrastructure such as land, school buildings, etc. They will also be responsible for management of the schools including provision of teaching. This would not only include employing of school teachers and other staff but also provision of teaching aids, laboratories, library, equipment, playgrounds and other extra-curricular facilities. The maximum capacity of a school would not exceed 2,500 students. Irrespective of whatever Board the school is affiliated to, the Schools would have to adhere to all norms of CBSE or as provided in the concession agreement with reference to infrastructure, teaching resources and pedagogy.

### **5.4 *Capital costs to be borne by private entity***

The estimated capital cost of setting up a senior secondary school would vary between Rs. 5 to 7 crore. It is envisaged that the entire capital expenditure for setting up schools under this scheme would be borne by private entities. This would imply sharing of the financial risk by the private entity which would receive payments from the Government only upon successful delivery of well-defined outcomes in the form of education services.

### **5.5 *Land to be arranged by the private entity***

The land required for establishing a school has to be procured by the private entities from the respective State Governments or local authorities at applicable rates. Alternatively, they may procure land and/or buildings from any other source either through purchase or by way of a long-term lease of at

least 30 years. The Central Government will advise the respective State Governments from time to time to facilitate private entities in procuring land.

#### **5.6 *Recurring/ academic support for 980 Government sponsored Students***

In each school, Government support shall be provided to 140 Select Students in each class totaling up to a maximum of 980 Select Students for the School.

Within the Select Students, reservation for SC/ ST/ OBC students shall be as per reservations applicable in the respective States. Further, there will be reservation of 33 per cent for girls amongst the Select Students. In the event that the reservation for girls is increased in the 3,500 Government model schools, the same shall apply to the PPP Schools. There will also be reservation as per the respective State Government norms for the disabled children. There will be no reservation for any category under the management quota.

In case, the private entity is unable to get adequate number of sponsored students in a particular class, the ceiling per class may be relaxed within the overall limit of 980 Select Students. In addition, the school management may enroll students on payment of fee as appropriate. The total number of students in the school shall not exceed 2,500 in any case.

The recurring support in respect of the tuition fees etc. for Select Students shall be equal to the average expenditure per student incurred in the Kendriya Vidyalayas. This support shall be made available to each School on a half-yearly basis in advance against bank guarantee of equivalent amount valid for two years.

For the year 2013-14, the amount of recurring support would be fixed provisionally on the basis of the actual expenditure per student incurred in Kendriya Vidyalayas during 2011-12 plus 10% thereof calculated at the rate of a provisional increase of 5% per annum. Before the close of 2014-15, the actual expenditure per student incurred in 2013-14 in the Kendriya Vidyalayas shall be computed and if such expenditure is higher/lower than the amount paid on a provisional basis for the year 2013-14, the difference shall be adjusted in the forthcoming payments due to the school. This process will apply *mutatis mutandis* to all subsequent years.

In the first year, classes 6 to 8 will be started together and thereafter one higher class would be added in each year till the school reaches class 12. Government support would be provided in the first year for 420 students and this would increase every year by 140 till year 5<sup>th</sup> when it would reach 980

A school may be run in a temporary or partial accommodation for the first two years. From the third year onwards, the school should have the entire infrastructure specified in this Scheme.

### **5.7 Support for infrastructure**

In addition to the aforesaid recurring support, a sum equal to 25% of the monthly recurring support for each Select Student shall be disbursed by way of infrastructure grant which may be used for defraying rentals, interest, debt repayment, etc. The annual infrastructure grant shall not exceed an amount equal to 10% of the capital investment in the school, as certified by an approved valuer.

### **5.8 Commencement of government support**

Government support under this scheme shall commence only after CBSE affiliation is granted.

### **5.9 Medium of Instruction**

The medium of instruction shall be as per the norms of the affiliating National Board.

### **5.10 Disbursements linked to output parameters**

The disbursements under this scheme shall be linked to the provision of specified infrastructure and delivery of agreed output parameters

A pre-determined system of incentives and penalties will be specified based on the CBSE results and other key performance indicators such as provision of qualified teachers, student attendance and dropout rate. The output parameters would be developed in accordance with the best practices and specified clearly in the Concession Agreement.

### **5.11 Graduated support based on location**

The support to be provided by the government will vary between locations having regard to the differential costs and the likely availability of students. The following graduated support would be provided for different locations:

- 75% in cities with population exceeding 30 lakh
- 90% in cities with population exceeding 10 lakh
- 100% in towns with population exceeding 1 lakh
- 105% in towns exceeding a population of 20,000
- 115% in a town/village with a population of less than 20,000
- 125% in NE, J&K & tribal areas

### **5.12 Duration of support**

Government support would be provided to each school for a period of 10 years in accordance with the above scheme. From the eleventh year onwards, recurring academic support shall be provided only in respect of the Select

Students who were enrolled during or prior to the tenth year and shall continue until completion of their school education. The concession can be extended by mutual consent.

### **5.13 *Concession agreement between Government and private entity***

A concession agreement specifying the rights and obligations of both parties shall be signed between the Government and the selected private entity. This will enable the private entity to raise funds from the financial institutions for meeting its capital expenditure. The concession agreements will specify the over-arching principles while sufficient flexibility would be provided to private entities to manage their respective schools in conformity with the socio-economic requirements of different regions. Regular monitoring would be undertaken by the Government for enforcing the provisions of the concession agreement. The key features of the concession agreement would be:

- Application of CBSE guidelines
- Scheme of financial support
- Key Performance Indicators
- Incentives and penalties
- Monitoring & inspection mechanism; use of UID
- Use of premises for other educational purposes
- Suspension/ Termination for breach of Agreement

### **5.14 *Tuition fee***

The Select Students of Class IX to XII would be required to pay a tuition fee to inculcate a sense of participation. A discounted fee of Rs. 25 per month would be paid by Select Students belonging to the SC, ST, Girls and BPL categories while other Select Students would be required to pay Rs. 50 per month.

### **5.15 *Market-based fee for other students***

Apart from the 980 Select Students, the private entity may enrol up to 1,470 additional students, who will be charged fees as determined by the private entity.

### **5.16 *Use of school premises by the private entity***

The private entity would be permitted to use the school premises for vocational education or any approved educational activity (excluding coaching) so as to enhance its revenue streams. This will help cross-subsidise the education for Select Students and also raise the level of other facilities. However, the additional revenue generated by the private entity will have to be ploughed back into the school and utilised towards improving the quality of the school.

### *5.17 Selection criteria for applicants*

Success of this scheme would depend on the private entities selected for this purpose. Private sponsors for these schools would, therefore, be selected on the basis of a transparent and fair selection process that would ensure selection of experienced, motivated and not-for-profit entities that are willing to invest their time and resources in creating centers of excellence in school education. The selection would be based on proven track record or capacity to establish and manage the schools rather than on financial bids based on the lowest offer. This is to ensure that the quality of education is not compromised by awarding schools to the lowest financial bidder, which in turn could result in lower salaries for teachers besides cost-cutting on other essential ingredients of good education.

An Applicant shall be eligible for pre-qualification in the following categories

- (a) An Applicant having experience of running a CBSE-affiliated school(s) where at least 2 (two) batches have passed out from Class X would be eligible for award of 3 (three) Schools against each such existing school;
- (b) An Applicant who is running a CBSE-affiliated school(s) from where 2 (two) batches of Class X have not yet passed out, shall be eligible for award of one School against each such existing school;
- (c) An Applicant would qualify for award of 3 (three) Schools as against each such existing educational institution provided it has:
  - (i) experience of at least 5 (five) years in running a secondary school, affiliated with any Board of Secondary Education or Intermediate Education, or
  - (ii) experience of at least 5 (five) years in running a post secondary educational institution (for imparting education in academic, technical or vocational courses) recognized/approved by a competent authority such as, the Central Government, State Government, Boards of Secondary Education, UGC, AICTE, MCI, ICAR, or other duly empowered authorities.

Provided that a selected Bidder who is eligible for award of Schools pursuant to this sub-clause (c) shall undertake to make an interest-bearing deposit of Rs. 25 lakh for each School awarded, which would be released in three equal annual instalments after the School is commissioned;

(d) any company (including a company incorporated under section 25 of the Companies Act ,1956) ,), trust or society having a Net-Worth of Rs. 25 crore or more during each of the preceding 2 (two) financial years and intending to set up a PPP school(s) through a not-for-profit entity specified in Clause 2.2.1(b) above would be eligible for allocation of one School for every Rs. 25 crore of Net-Worth, provided it shall undertake to make an interest-bearing deposit of Rs. 50 lakh for each School awarded to it, which would be released in three equal annual instalments after the School is commissioned in accordance with the Concession Agreement. In case more than 3 (three) Schools are allocated to a single entity under this clause 2.2.2(d), it shall make an interest-bearing deposit of Rs. 25 lakh for each additional school awarded to it.

A fair and transparent system of evaluation and scoring would be evolved and announced before inviting applications under this scheme. The selection criteria and its application would be fair and transparent so that in addition to ensuring that the best available applicants are selected, the selection process also enhances the confidence of the civil society in this initiative. For each location, the applicant who gets the highest score shall be the preferred applicant for award of the concession under this scheme.

An applicant under this scheme may either set up a new school or upgrade an existing institution to meet the requirements of this scheme.

#### **5.18 *Ceiling on number of schools***

Not more than 50 schools may be awarded to a single entity. No single entity would be permitted to establish more than 20 schools in a single State or Union Territory. The above ceiling may be suitably relaxed if there are no eligible applicants for any particular location.

#### **5.19 *Selection criteria for students***

Students will be selected by the management of the school on the basis of a transparent criteria and process which is consistent with the objectives of this Scheme. The selection criteria applicable to the 3,500 State sector Model Schools, to the extent applicable to this scheme, shall broadly apply to the PPP Schools.

#### **5.20 *Roll-out of the Scheme***

The award of concessions would be spread over 3 years based on the following indicative roll-out plan:

Academic Year	No. of schools
2012-13	500
2013-14	1,000

### **5.21 Bidding Process**

Bidding would take place for each of the 2,500 Blocks. Each bidder would have to provide details about its financial and technical eligibility and capability. The criteria for evaluation and scoring of bids would be provided in the bidding documents (RFP).

### **5.22 Managing Committee/ Governing Board**

The Managing Committee/ Governing Board will have adequate representation from the parents, local bodies, State Government and educational experts. This would enhance the spirit of community participation and accountability that would help the schools to benefit from local support.

### **5.23 Teachers' Salaries and Training**

The quality of education is directly dependent on the quality of teachers and the level of their knowledge and skills. Since the selected private entity would, as a condition of this Scheme, be required to commit that it shall pay to its teaching staff salary and allowances no lower than the scales applicable for the KV schools, it should be possible for private entities to employ well-qualified teachers. Their training would be mandatory and shall conform to the standards recommended by CBSE for this purpose. It is expected that this arrangement would help create quality teachers who would set benchmarks in their respective spheres of influence.

### **5.24 Name of Model Schools**

All schools under this scheme shall be known, promoted, displayed and advertised by the name of Rashtriya Adarsh Vidyalaya. However, the respective private entities would be permitted to add two words of their choice (not being a name associated with any religion, caste or surname) before the words 'Rashtriya Adarsh Vidyalaya'. The said two words will be placed in the upper line and the name of the school i.e. Rashtriya Adarsh Vidyalaya will be prominently displayed in the main line. However, once the Government stops sponsoring the Select Students, the words "Rashtriya Adarsh Vidyalaya" will no longer be used by the private entity.

### **5.25 Networking responsibility**

These schools are expected to serve as models for all schools in their neighbourhood. They will be expected to act as mentors for other schools in the Block, organise bi-annual conferences for experience sharing and generally disseminate best practices. Their networking with other schools is expected to have a snowballing effect in improving school education in their respective Blocks.

### **5.26 *Special teaching for weaker students***

In order to ensure the optimal level of learning achievement, intensive supportive teaching at the beginning of Class VI will be arranged so as to enable smooth transition of students to Class VI. Since many of the Select Students may have studied in the regional medium up to Class V, whereas the medium of instruction in the model school could be English, intensive coaching in English language will be made available by the school for students in classes VI and VII.

### **5.27 *Role of the State Government***

The State Government may facilitate availability of land for the school. It may also consider providing financial support beyond the initial 10 year period of support from the Central Government. It would also be requested to provide uniforms and mid-day meals as applicable in Government schools. The State Government may also consider providing transport subsidy or free transport for students to come from different parts of the Blocks to the school and back.

## **6 *Concession structure***

A Design, Build, Finance and Operate (DBFO) model would be followed for this scheme. At the end of the concession period, the school would remain with the private entity. The concessionaire would be responsible for financing, constructing and maintaining the physical infrastructure of the school campus and for managing the school in accordance with laid down parameters and key performance indicators.

## **7 *Enforcement and Inspections***

- 7.1 The concession agreement would be enforced by regular inspections, audit and monitoring for quality assurance. There would be stiff penalties for violation of the agreement or for shortfalls in key performance indicators coupled with incentives for better performance.
- 7.2 Detailed arrangements would be spelt out in the concession agreement for regular reporting of outcomes which will be closely monitored by the Government through extensive use of IT and UID systems besides appropriate tests, inspections and surveys. Since payment to the private entity will be based on output parameters, a close monitoring thereof would be ensured. Detailed arrangements for regular monitoring would be spelt out and enforced as part of the concession framework.

## **8 *Nodal Agency***

For initiating and implementing this scheme for 2,500 PPP schools, the Government will set up a nodal agency broadly on the lines of Kendriya

Vidyalaya Sangathan, but with special emphasis on creating inter-disciplinary capacity to roll-out and monitor this scheme. The Nodal Agency called “Model School Organisation” or “Adarsh Vidyalaya Sangathan” may have regional offices, as necessary. Expert staff would be hired on contract basis, as necessary. The institutional approach and mindset required for rolling out and managing PPPs in school education is significantly different as compared to the direct control and administration of schools. Hence, a separate agency would be essential for ensuring the expected outcomes of this scheme.
